REALISTIC EDUCATION AMONG DIGITAL YOUTH (R.E.A.D.Y)

DigiComp 2.2 For Citizens Questionnaire

Dear Participant

The Digital Competence Framework for Citizens (DigComp) has provided a common understanding, across the EU and beyond, of what digital competence is, and therefore provided a basis for framing digital skills policy. DigComp is the EU-wide framework for developing and measuring digital competence.

This questionnaire was prepared based on the framework in the article that was written by Vuorikari, Kluzer and Punie (2022) ""DigComp 2.2 The Digital Competence Framework for Citizens With new examples of knowledge, skills and attitudes" *published by the European Commission in 2022.*
